# Edgar Benavides

Software Engineer • Full Stack Developer

## 👤 Profile

I am a Computer Systems Engineer specialized in web development. Since 2020 I have worked as a web developer at Bitmart, helping the company grow by automating its processes through the development of modern web applications with React and micro services with Node.js from scratch.

At the beginning of this year, together with friends, I have started a project that will help both customers and local businesses to improve their interaction.

Featured own projects:

**Taquizas el Garage** - Landing page for a Mexican food business located in the United States.

## 💼 Experience

### Freelancer, Uriangato

January 2020 — August 2021

*Responsibilities:*

- Built landing pages for clients, which allowed them to boost their business, increasing their sales.

Tech Stack:
